

AGRI DISC HUB – AS SERIES

NSK's Flanged Bearing Unit (4,5,6 holes) with integrated shaft sealing and a angular contact ball bearing with 40 ° contact angle. Specially designed to be interchangeable, maintenance free, increasing the machinery's availability and reliability in extreme conditions. For applications that include cover-crop, front-packer, seeding, row cleaning, mowing and finger-weeding.

CONDITION DESCRIPTION

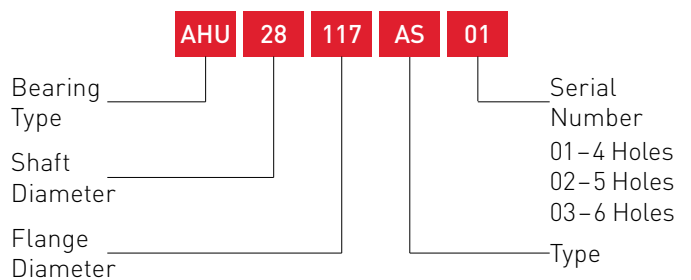

- Contamination
- Corrosive environment
- High Load
- Lubrication

INDUSTRIES

- Agriculture
- Forestry

PRODUCT FEATURES

- Optimised interior design
- Angular Contact Ball Bearings with split inner ring
- Higher contact angle - 40°

BENEFITS

- Long-life
- Easy mounting
- Optimised seal
- Flanged bearing fitted to customer's requirement
- Higher contact angle for higher axial load
